

Drive Business Outcomes with Clear Automation KPIs Tracked in Real Time

RESOLVE ACTIONS ROI DASHBOARD

resolve.io

Measure The Impact of Automation & Orchestration in Real Time

Today's IT leaders need more than visibility; they need proof. The Resolve Actions ROI Dashboard delivers just that: a real-time, executive-level view into how automation drives measurable business outcomes. From ticket deflection and MTTR reduction to cost savings and operational efficiency, this dashboard quantifies the value of every workflow.

As organizations embrace Zero Ticket IT, the ability to track outcomes, validate impact, and communicate value becomes essential. The ROI Dashboard turns performance data into strategic insight, fueling automation-first cultures and accelerating adoption at every level of the business.

Metrics Available Out of The Box

Time Savings

Visualize cumulative time savings and drill into the workflows driving the biggest gains.

Cost Savings

Quantify the financial impact of automation with insights into where you're saving the most.

Top Performing Workflows

Filter by the workflows creating the most value by time period, team, or use case.

Automation Trends

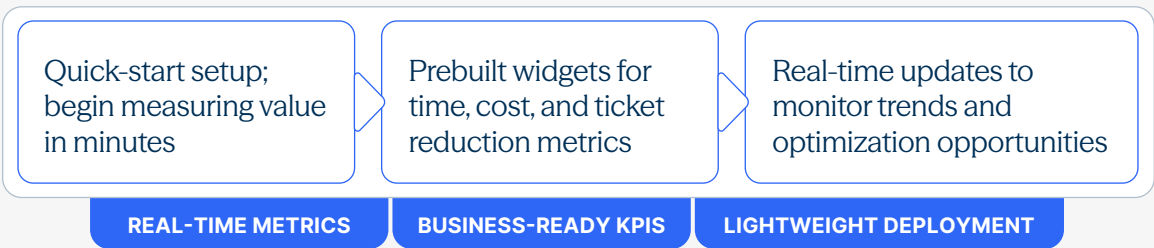

Track KPI trends across time, projects, and business units to identify emerging opportunities.

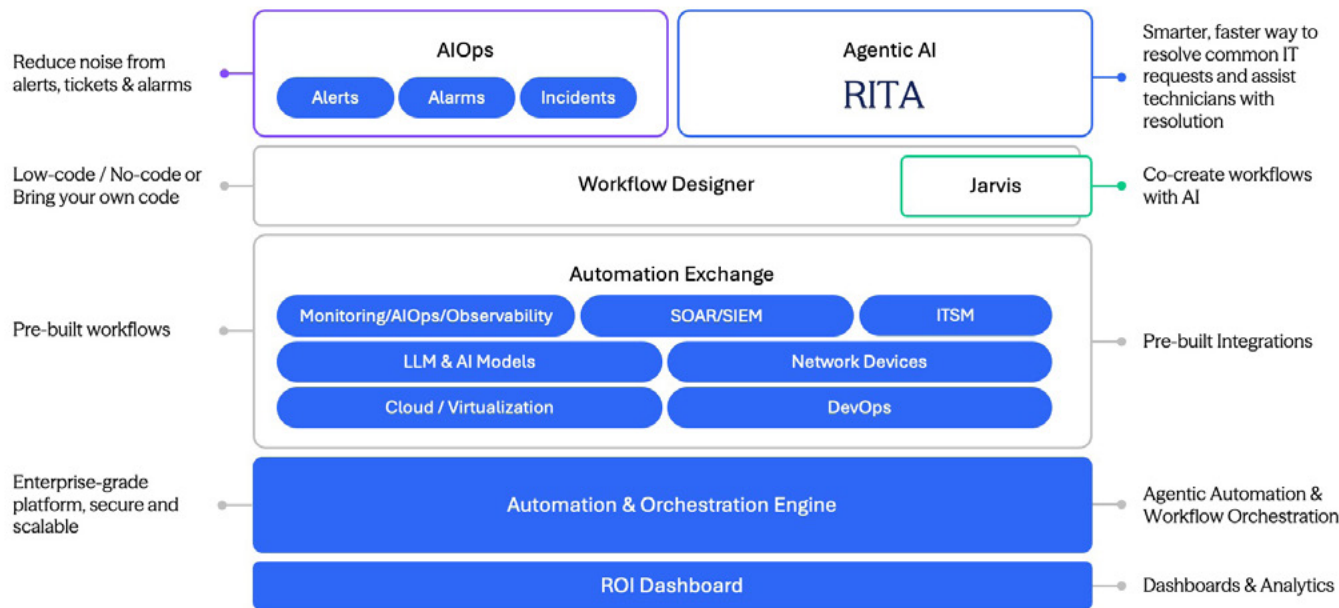

Resolve Actions ROI Dashboard Benefits

-  Measure automation impact with business-friendly metrics
-  Showcase the performance of your top agentic workflows
-  Bridge the gap between IT and the business with ROI-focused visuals
-  Promote a culture of automation by highlighting wins in real time
-  Empower leadership with data to guide future investments

Features and Capabilities

Built on A Powerful, Scalable Platform

Low-Code, High Impact

Use Jarvis, our intuitive drag-and-drop AI agent, to build workflows without complex scripting.

Broad Ecosystem Integration

Resolve integrates bi-directionally with virtually any system for frictionless deployment.

Flexible Deployment Options

Available in the cloud or on-prem, Resolve adapts to your environment and security posture.

Automation Exchange

Leverage hundreds of prebuilt workflows and integrations to accelerate time to value.

Autonomous Resolution

RITA, our agentic ticket deflector, resolves service desk tickets before they reach your team.

Security and Compliance

SOC I and II compliant. A platform built with enterprise-level security and compliance standards to protect your data and operations.

Purpose-Built for Agentic IT Operations

- ✓ IT Operations Management
- ✓ Network Operations
- ✓ Cloud Operations

Key Capabilities

- ✓ No-Code Workflow Builder
- ✓ Agentic Automation Dashboard
- ✓ Remote & Event-Based Execution
- ✓ ML-Enhanced Self-Service Portal
- ✓ Scheduled & Real-Time Workflows
- ✓ Cloud & On-Prem Deployment
- ✓ Automation Exchange Library

About Resolve

Resolve is redefining IT and network operations with an agentic automation and orchestration platform built for the Zero Ticket™ future. Our platform automates manual workflows to autonomously detect, diagnose, and resolve incidents before they impact the business. By transforming reactive workflows into proactive, self-healing systems, Resolve slashes ticket volume and alert noise by up to 90%, reduces MTTR from hours to minutes, and empowers IT teams to scale without increasing headcount.

Trusted by some of the largest global enterprises, Resolve empowers IT teams to move from reactive firefighting to proactive transformation. Learn more at resolve.io
