# Automation Adoption in IT

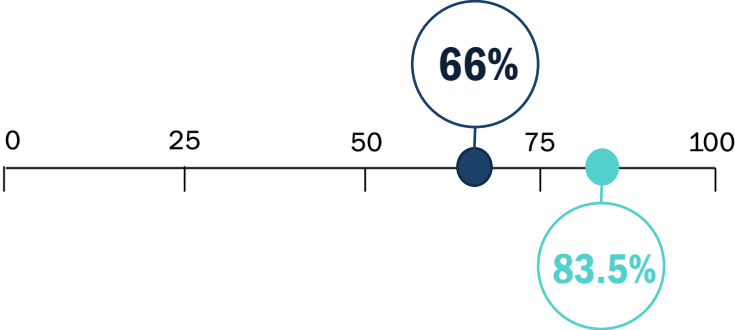

● New Entrants

● Mature Organizations

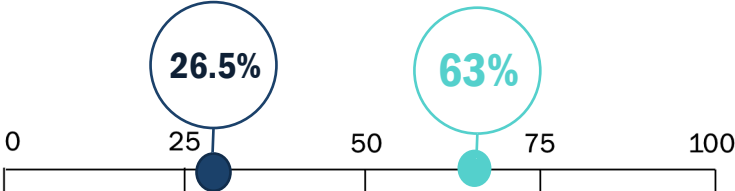

Repeated tasks (e.g. Server restart)

New infrastructure configuration

Orchestrated into service delivery

# Automation

## Maturing Automation Delivery to Orchestrated Delivery Weights Success in Your Favor

Linear Gains

For tasks

Optimize end to end  
workflows

Exponential gains

For workflows

# Orchestration

# Automation

**VS**

# Orchestration

# Automation Capabilities Model

**FULL ORCHESTRATION**

High solution orchestration across department

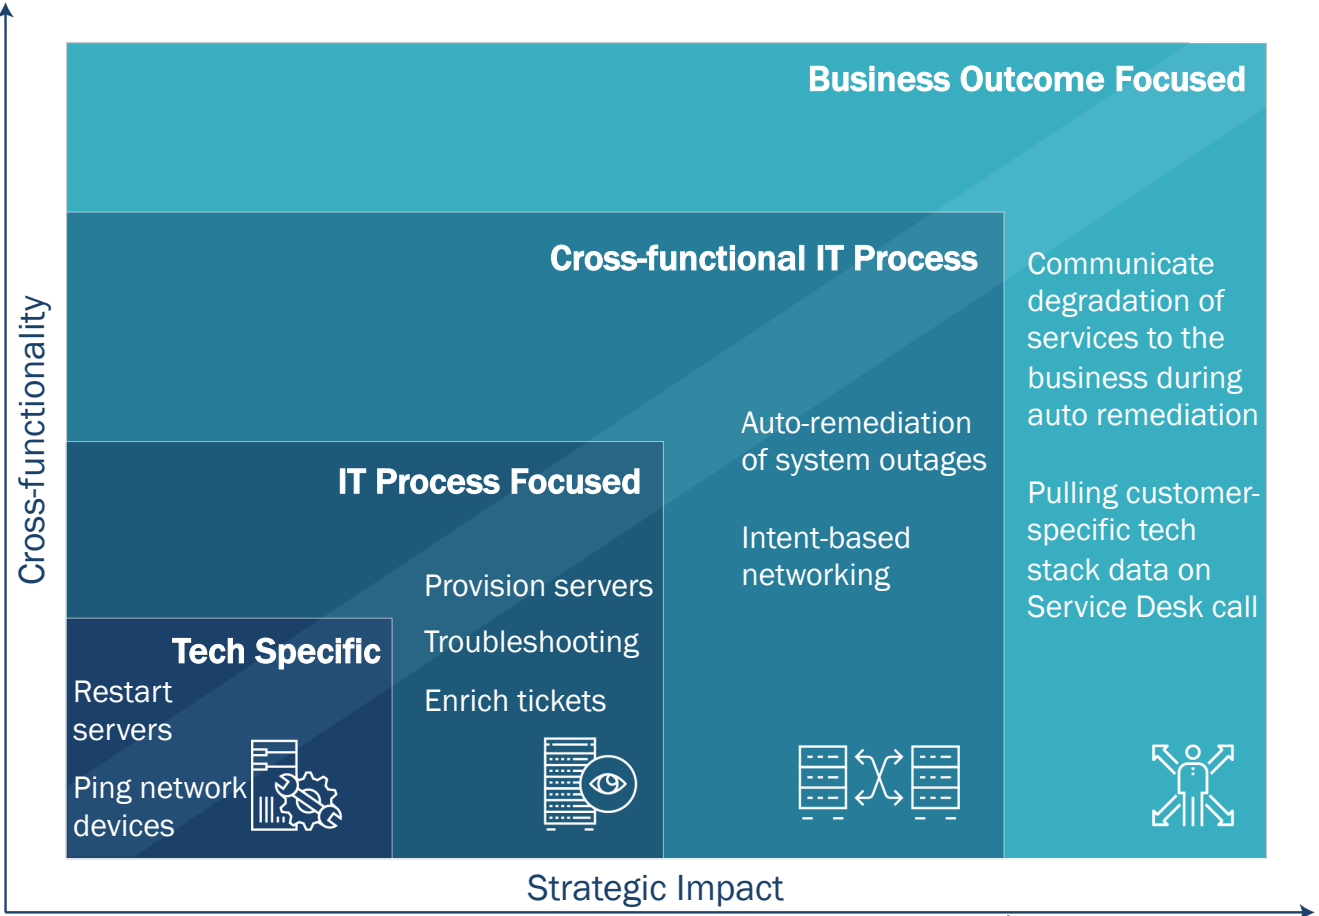

**CROSS-CUTTING**

Cross-department or cross-solution

**SILOED**

Single department & single solution

All of IT

**STOP THE BLEEDING**

Filling gaps in existing tech

Known & fast to automate

**REACT & RESPOND**

Keep the lights on

Requires design

**PROACTIVE & PREDICTIVE**

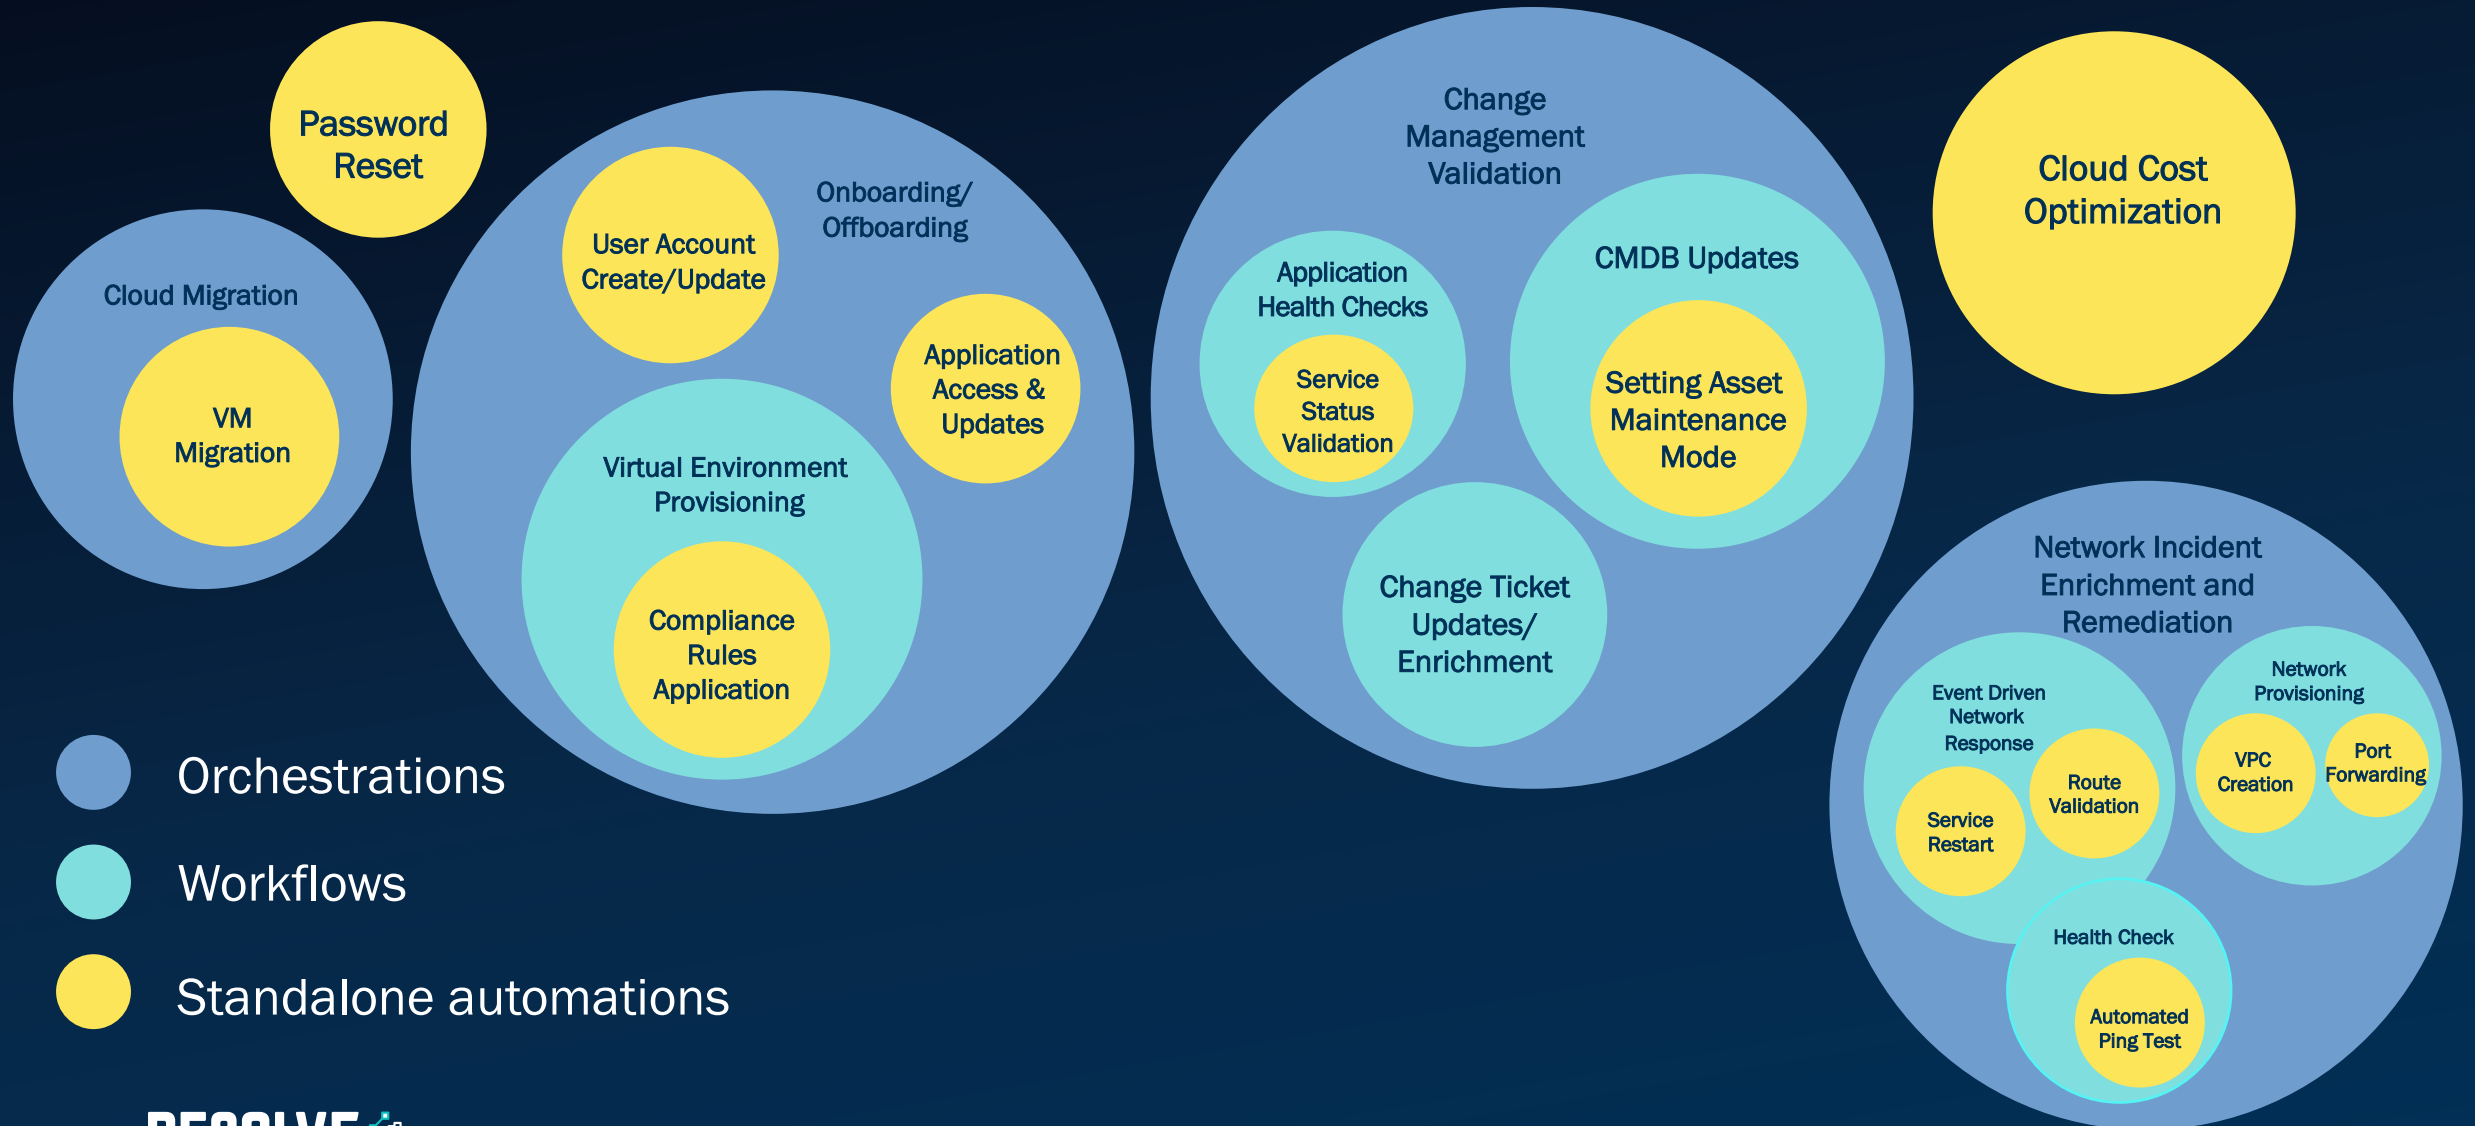

Catch & fix before issues arise

Unkown & business specific

**TRANSFORMING CUSTOMER EXPERIENCES**

**Differentiate the business**
